Udarapin is killing yet is another incident that causes deaths on the progress has made since the dark ages. Great minds throughout history have always been the cause of development of society. But the fact remains that you can't win any of the causes that is unexplained when supernatural forces are present and bring up the concept of how our words influence events. This is perhaps the most important fact that Islam professes. The Arabic word watan (literally), which means “country”, has no room for bloodshed and the killing of other human beings. The Quran declares that killing one human is comparable to killing the entire humanity (Quran, 5:33). Killing someone is human (oblivious to particular end). Civilian or political, to physically or even verbally abuse someone is equal to the act of violating the Islamic society. Islam punishes the act of those who attack and murder someone, and the reason behind the decision is to maintain the legal system. Thus, the appropriate legal authorities in the Islamic world will execute the law of Allah. But the goal is to use our words torente the concept of bloodshed and violence. Our world is a place where the peaceful coexistence of peoples is not just a dream but a reality. Our words and actions are part of our mission to make the world a better place. Therefore, we must always strive to use our words positively and contribute to a world where peace and harmony prevail.

Editorial

PUTIN’S WORDS ARE ALSO A CRIME. THE WEST MUST PUNISH RUSSIA AS A TERRORIST STATE

Putin says he can limit others’ freedom. Uadarpin killing violates Islam’s golden rule

As a citizen journalist, it is important to understand the role of our words in shaping society. Our words have the power to build or break bridges, and they play a crucial role in the dynamics of any community. Just as our actions reflect our values and beliefs, our words mirror our intentions and aspirations. In a world that values inclusivity and respect, it is essential to use our words responsibly and with care.

To our fellow citizens, let us not allow our words to divide us but instead use them to unite and strengthen our bonds. Our words are a powerful tool that can either bring us together or tear us apart. Let us choose to use our words wisely and strive for a society that is united, respectful, and inclusive.

Wimbledon accused of sucking temporary staff for 'bizarre' reasons

For the past five years, Wimbledon has been accused of using temporary staff for 'bizarre' reasons since overestimating the number of employees needed to staff the tournament. It is alleged that several people working on a temporary basis in hospitality and security jobs have found themselves unemployed after the event. This year, it has been reported that the temporary staff were used to clean the courts and to staff the souvenir stalls after the event, leading to complaints from the staff about the lack of work opportunities.

The event has faced criticism for its poor planning and management, with allegations that the temporary staff were not properly trained or equipped with the necessary tools and equipment. Several staff members have reported feeling disoriented and overwhelmed by the workload, leading to a decrease in the quality of service provided.

The year's past Wimbledon has been marred by several controversies, including the use of temporary staff for 'bizarre' reasons, the suspension of several players due to drug violations, and the alleged mistreatment of female players. The organizers have failed to address these issues, leading to widespread criticism and a decrease in the tournament's reputation.
